DETAILED ACTION

Allowable Subject Matter

Claim 20 is allowed.

The following is an examiner's statement of reasons for allowance:

As for claim 20, the prior art does not teach or fairly suggest the use of a focusing apparatus for executing a focusing calculation according to an image signal from a plurality of sensor blocks, wherein a control circuit for controlling accumulation of the image signal in a sensor block is controlled by a reading processing circuit based on a result of determination of an accumulation condition (threshold) that can be changed in accordance with a P-B signal, wherein, the reading is performed if the P-B signal is greater than or equal to a threshold and not performed if the P-B signal is less than the threshold.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
